

# Xlsx to Wwise

Automation of Wwise project creation from Excel

## Product Overview

Xlsx to Wwise is a tool designed to simplify and automate the creation of Wwise projects from a production Excel (.xlsx) file. It is a robust and flexible solution, built to accelerate audio pipelines while ensuring data reliability and consistency.

Thanks to this automation, tedious manual tasks are a thing of the past: configuring audio objects and their interactions in Wwise happens in the blink of an eye.

## Key Features

- **Robust and Reliable Production**

All generated naming conventions are 100% compliant with the data from the production spreadsheet.

- **Significant Time Savings**

No more manually connecting events or entering information by hand in Wwise — the tool takes care of everything.

- **Fully Automated Generation**

- Audio objects and their associated events are created automatically
- Containers are generated and structured within the Actor-Mixer hierarchy
- Play and Stop events preconfigured
- Automatic setup of RTPCs (Bus Volume, Voice Volume, High-Pass Filter, Low-Pass Filter, Pitch)
- Generation of State Groups, Switch Groups, along with their respective States and Switches

- **Versatility**

The tool supports both SFX and voice assets, ensuring maximum adaptability.

- **Ready-to-use Project**

All that's left for you to do is:

- Copy the Work Units from the provided archive into the corresponding folders of your Wwise project
- Routing to the generated buses
- Organizing the containers into the appropriate Work Units

This solid foundation, adaptable to each team and pipeline, enables a fast and structured start to any Wwise project.

## Customizable

If you have specific needs not covered by the standard version, and the features are available via WAAPI, I can develop tailor-made solutions suited to your production workflow.

## Service Details

Two collaboration modes are offered to you:

### 1. Assisted Conversion

- You provide a non-compliant Excel file
- I will bring it into compliance with the tool's standards, then generate the Wwise project

### 2. Direct Conversion

- You use my predefined Excel templates
- Immediate project generation with no further intervention required

	A	B	C	D	E	F	G	H	I	J	K	L	M	N

#### Delivery :

The project is provided to you as Work Units archives, ready to be integrated into the Wwise directories. Minor adjustments may be required depending on your project architecture, but the main structure is turnkey.

🔊 *Note: Music management is not yet supported.*

## Pricing

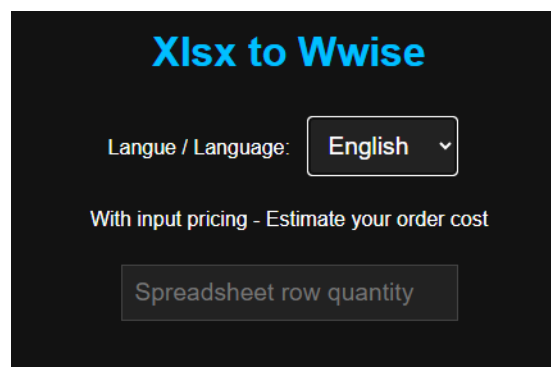

Billing is done per line, with a differentiated rate depending on whether there is data entry and adaptation for the setup of the generation. To find the price based on the number of lines, simply visit the online estimation.

Pricing with your data already entered in the spreadsheet I provide. The price includes the generation as well as the delivery of the Work Units to be migrated into your project :  
<https://alexandrebaranger.github.io/XlsxToWwise/xlsx2wwisepriceNO.html>

The screenshot shows a dark-themed web interface titled "Xlsx to Wwise" in blue. Below the title, there is a label "Langue / Language:" followed by a dropdown menu currently set to "English". Underneath, the text "No input pricing - Estimate your order cost" is displayed. At the bottom, there is a light gray rectangular input field with the placeholder text "Spreadsheet row quantity".

Pricing with data entry into my spreadsheet: the price includes data entry, generation, and the delivery of the Work Units to be migrated into your project :  
<https://alexandrebaranger.github.io/XlsxToWwise/xlsx2wwisepriceS.html>

This screenshot shows a similar dark-themed web interface titled "Xlsx to Wwise" in blue. It features the same "Langue / Language:" dropdown menu set to "English". However, the text below the menu reads "With input pricing - Estimate your order cost". The "Spreadsheet row quantity" input field is also present at the bottom.
